### SUMMARY

Computer Engineering student with a strong interest in cybersecurity, focusing on programming, network security, ethical hacking, and data protection. A proactive learner with solid problem-solving skills, committed to understanding and addressing modern security challenges in technology.

### EDUCATION

**Trinity International College** **2018-2020**  
Class 12  
CGPA - 3.43 / 4

**Vishwakarma University** **2022 - 2026**  
Bachelor's in Computer Engineering  
CGPA - 8 / 10

### TECHNICAL SKILLS

**Languages :** Python, Bash Scripting

**Web Dev :** HTML, CSS, Javascript, SQL

**Tools:** Burpsuite, Metasploit, Nikto, Wireshark, Nmap, Hydra, Maltego, Splunk, Vscod

**OS:** Windows, Mac, Linux

### EXPERIENCE

**Cyber Security Intern – NullClass** **6 Months**

- Monitored security alerts and events using SIEM tools to identify potential threats
- Analyzed logs and investigated incidents to support threat detection and response
- Worked on real-world cybersecurity projects

### PROJECTS

**Phishing URL Detection System:-** ML-based web application that detects phishing URLs using feature extraction and a trained model, providing risk scores and security insights.

**File Type Analyzer:-** Developed a Python-based tool to identify and analyze file types, enhancing understanding of file handling and security inspection techniques.

**Password Analyzer:-** Developed a tool in Python that evaluates password strength and recommends improvements, focusing on cybersecurity fundamentals.

### CERTIFICATIONS

#### Coursera:-

Google Cybersecurity

Microsoft Cybersecurity Analyst
